Glow In The Dark

If you want to make an impression whether the lights are on or off, check out our Glow In The Dark options. You can choose Glow In The Dark hardware or Glow In The Dark lacquer finishes. You can even go all out and combine them both! Glow hardware is only available in one color but there are many choices available in glow lacquers. Glow duration varies depending on the strength and amount of light it is exposed to. Under black light, glow finishes are "always on." Also, the darker colors in the glow lacquers will not glow as brilliantly as the lighter colors in the glow lacquers. Available only from Spaun... custom drums as unique as you are.

Split Snare

These unique snare drums feature a 1" split in the center of the drum. This allows the air to escape immediately which results in higher volume, more projection, and extremely sensitive snare response. One of the characteristics you will notice is that ghost notes are amplified in relation to full volume notes. Accentuating both crack and sensitivity, split snare drums are an excellent choice for high volume situations and where busy sticking patterns need to penetrate the mix. With a very distinctive voice, the split snare may not be the proper choice as your only snare drum, but every drummer should have one in their arsenal.
